DEPARTMENT OF BOTANY

REPORT ON POSTER PRESENTATION ON THE EVE OF NATIONAL SCIENCE DAY

The Department of Botany, SCIM Government College, organized a Poster Presentation on the eve of National Science Day under the theme **“From Curiosity to Discovery-The Power of Science.”** The objective of the program was to inspire students to explore scientific ideas, develop curiosity, and understand the process of discovery through research and innovation.

Students from I, II, and III year actively participated in the event with great enthusiasm. They presented creative and informative posters on various topics such as plant diversity, environmental sustainability, climate change, medicinal plants, biotechnology, and ecological conservation, all reflecting the theme of transforming curiosity into scientific discovery.

The program was inaugurated by the Principal, who highlighted the significance of National Science Day and encouraged students to cultivate a scientific mindset. The faculty members of the Botany Department guided the students in designing their posters and played an important role in organizing the event.

Participants explained their posters confidently, showcasing their understanding, creativity, and communication skills. The posters were evaluated by the judges based on originality, scientific content, presentation, and relevance to the theme. The judges appreciated the students' efforts and emphasized the importance of questioning, observation, and experimentation in science.

Winners were awarded prizes for their outstanding performances, and all participants received certificates of participation. The event concluded with a vote of thanks, acknowledging the support of the Principal, faculty members, and students.
