**FIELD VISIT TO RARS MARUTERU DURING KISAN MELA**

The Botany Department of SCIM organized an educational field visit to Regional Agricultural Research Station (RARS), Maruteru, on the occasion of Kisan Mela. The visit aimed to provide students with practical exposure to modern agricultural practices and recent advancements in crop science.

B.Sc Botany group students, and accompanied by one faculty member Dr Y. Vijayakumar, participated in this field trip. Upon arrival, the students explored various exhibition stalls set up as part of the Kisan Mela. These stalls showcased innovative agricultural technologies, improved seed varieties, fertilizers, pest control methods, and sustainable farming practices.

One of the major highlights of the visit was the observation of extensive rice fields maintained by RARS. Students closely examined different varieties of paddy crops, their growth stages, and cultivation techniques. Scientists and agricultural experts at the station explained the importance of high-yielding varieties, disease-resistant strains, and water management practices in rice cultivation.

The students also interacted with farmers and researchers, gaining valuable insights into real-world agricultural challenges and solutions. Demonstrations on modern equipment and organic farming practices further enriched their understanding.

The visit was highly informative and helped bridge the gap between theoretical knowledge and practical application. It enhanced students' awareness of agricultural research, crop improvement, and the significance of scientific farming in ensuring food security.

Students with Honourable MLA Sri Arimilli Radha Krishna
